tedee smart lock system

New way to enter.

Unlock the door automatically and remotely.
Share "digital keys" and integrate your lock with a smart home system.

What your tedee day looks like.

See how a smart lock changes the way to access your place.

7:49
Off to work!

The door locks automatically and integrates with your radio to turn the music off.

9:29
Delivery!
Is anyone there?

Courier calls. You unlock the door remotely. The package safely waits for you inside.
11:01
Time to clean up

A cleaning service accesses your place once a week in set hours with just an app. It's best for everyone.

15:50
Dad, we're home!

A push notification pops up on your screen when kids get back from school.

17:43
Groceries
on the way

Don't look for keys. It's enough to carry heavy bags. What a treat your door unlocks automatically.

23:18
Have you locked
the door?

Just ask a voice assistant on your bedside smart speaker. Sleep safe.

tedee smart lock

Battery-powered mechanism mounted on the inside of your door.
Charge as little as every 14 months, when used up to 8 times per day.

Locks and unlocks with a button or click on the app.
Connects to tedee bridge for remote features and integration with smart home systems.

Requires a dedicated cylinder or adapter for your lock type.

Available in white/silver and graphite colourways.

works with
Hey Google

Works with
Apple HomeKit

tedee smart bridge

It connects to your tedee with Bluetooth and the internet via Wi-Fi.
Like a bridge between your smart lock and the global network.

Using a bridge gives you features available only in the online mode:
auto-unlock, remote opening, notifications and auto-updates.

It also enables more opportunities for integration with voice assistants and smart home systems.

You can plug it directly into a power socket or connect it with a micro USB cable, up to 2m away from your lock.
tedee keypad

Unlock the door without an app or smartphone: simply by entering a PIN.

Choose from five to eight digits - set, change, and assign via mobile app.
Manage up to 100 codes and share them in your favourite way.

Setup in minutes, power by three AAA batteries.
Install with adhesive or screws - even outdoors.

Modular cylinders

Connect to the smart lock on the inside. Use with a key from the outside.

Modular construction lets you adjust the cylinder length to fit every Euro-profile lock.

Manufactured by reputable European door hardware brands: GERDA and M&C.
Certified with Class 6 or SKG*** security ratings.

tedee adapters

Hardware connecting smart lock to your door without replacing cylinders and changing keys.

Compatible with European, Nordic, and Swiss lock types.

Easy to reinstall when you move out.

Available in silver and graphite colourways.

European adapter requires cutting one key.

Open for visitors.

Smart lock makes short-term rental easier and more cost-effective.

Whether you're subletting a room, managing multiple apartments, or leasing a beach house.

Give access with an app

Booking received? Grant your guests access to the rental with the app, or text them a PIN. It's like they have the keys already.

Control booking time

Set your rental available only in a fixed time frame: from check-in to check-out hours.

Never handle keys again

It's a hassle for visitors and yourself. Change to smart lock and never make extra, hand over, or collect keys again.

Forget appointments

They require scheduling that nobody wants – especially on vacation. Let your guests arrive at whatever time they wish.

Rent remotely

Manage your place – or many properties – wherever you are. Grant access to your administrator, cleaning services, or repairs.

Check the status

Smart lock activity logs and battery status are always available in the app or desktop portal.

Coming soon: channel management integration

For automatic access sharing and control, synchronised with leading booking platforms.

Rental host kit.

tedee smart lock
for keyless access.

tedee smart bridge
for remote management.

tedee keypad
for unlocking without the app.

Open for business.

A smart lock is an easy way for access control at your company.

No matter if you need to secure a storage room or start a multi-door security system at the office.

Discard work keys

Your employees use smartphones anyway. These are excellent replacements for keys and access cards. With smart locks, your team can use an app or just a PIN.

Control precisely

You can grant access to a single door or a whole building, permanent or just 9-to-5, Monday to Friday. A complete history of events is always available, too.

Pay once

Access to the tedee business tools is free. This way, running access management at your company costs just as much as devices.

Manage from desktop browser

Thanks to a dedicated business portal, maintaining multiple smart locks, employee accesses, and even organizations still is convenient.

Share the administration

There are three access levels: owner, administrator, and guest. This way, you can share control over access with office manager, IT service, or security team.

Customize your setup

Public cloud-based API gives a chance to integrate smart locks into diverse professional solutions: from hotels through residential buildings to head offices.

All locks. All users. One place.

tedee business portal is a desktop browser interface that makes access management even easier.

Grant and revoke access

Easy on- and off-boarding.

Monitor activity logs

Check who and when has used what lock.

Manage multiple doors

Connect all your smart locks to one control hub.

Check the status

See updates and battery levels of your devices.

Unlock smart home.

Include your smart lock in automated scenes. Manage access via central interface. Ask voice assistants to let guests in.

Control your lock with Siri, Google Assistant, or Alexa

Simply ask your favourite voice assistant on enabled smartphones, smartwatches, TV hubs, smart speakers, and others.

Manage access via central interface

Connect tedee with your smart home hub to control the smart lock where you manage all devices.

Synchronize with other smart equipment

Turn lights off when you leave. Play the music upon arrival. A smart lock on a threshold of your place acts as the perfect trigger for everyday automation.

Integrate with your smartphone

Hey Google and HomeKit compatibilities let you add tedee to Google Home on Android or iOS Home apps, on devices you probably already have.

For professionals

Cloud-based API and developer resources allow smart home professionals to integrate tedee into custom-designed systems and advanced setups.

Smart home integrations require tedee smart bridge.

It is not required for Apple HomeKit integration only.

From door to door.

At least 15 smart home standards worldwide already use tedee smart locks.

There's a big chance the system at your place can, too. This list never stops expanding.
